

FOR IMMEDIATE RELEASE

Saab unveils the new Saab 10-5

New flagship combines V12 hybrid performance, advanced autonomous driving and personalised technology

TROLLHÄTTAN, Sweden, September 11, 2026 – Saab today unveiled the new Saab 10-5, a flagship vehicle combining high-performance engineering with a new generation of intelligent, personalised technologies.

The Saab 10-5 is powered by a V12 hybrid powertrain developing 693 hp and 1,021 Nm of torque, paired with an 11-speed dual-clutch Saabtronic transmission. The vehicle accelerates from 0 to 100 km/h in 2.9 seconds.

The new model also introduces Saab's latest technology platforms, including Saabonomous Driving, Saabriver driver recognition, the Saabomboclat Infotainment System, and a range of new technologies covering lighting, seating, audio, cabin atmosphere and vehicle dynamics.

"The Saab 10-5 represents a new direction for Saab. We have combined our approach to engineering and technology with a much stronger focus on the individual driver. The result is a vehicle that delivers exceptional performance while adapting itself to the people who use it."

— Erik Lindqvist, President and Chief Executive Officer, Saab Automobile

Performance and dynamics

The Saab 10-5's V12 hybrid system produces 693 hp and 1,021 Nm of torque. Power is delivered through Saabtronic, an 11-speed dual-clutch transmission developed specifically for the vehicle.

The transmission and associated thermal-management architecture incorporate Saab's Saabrication cooling technology and approximately 210 components.

With a claimed 0–100 km/h time of 2.9 seconds, the Saab 10-5 combines the performance of its hybrid powertrain with the refinement expected from a flagship vehicle.

The vehicle also features Saabottom, a rear-wheel-steering system capable of turning the rear wheels by up to five degrees. The system is designed to reduce the vehicle's turning radius and improve manoeuvrability at lower speeds, while supporting the vehicle's dynamic behaviour at higher speeds.

The Saab 10-5 has a 3,016 mm wheelbase.

Saabonomous Driving

The Saab 10-5 introduces Saabonomous Driving, Saab's advanced autonomous driving

platform.

The system forms part of the vehicle's broader electronic architecture, integrating vehicle sensing, control and driver interaction into a unified system.

Saab has developed the platform around the principle of combining advanced automation with a highly personalised driver experience.

A vehicle that recognises its drivers

A central component of this approach is Saabriver, Saab's driver-recognition and personalisation technology.

Saabriver can recognise up to 30 individual drivers and automatically load their respective preferences. The system is designed to welcome recognised drivers and provide a personalised vehicle environment without requiring the driver to manually configure the vehicle each time.

The technology extends across the Saab 10-5's digital and comfort systems, creating individualised experiences for different drivers of the same vehicle.

Saabomboclat Infotainment System

The Saab 10-5 features the new Saabomboclat Infotainment System, bringing together infotainment, navigation, vehicle functions and connected features.

The system incorporates Saabitch, Saab's intelligent assistant, which provides voice-based assistance and access to vehicle functions at the driver's request.

The driver's instrument interface is centred around a 12.3-inch Saab Darkroom, while the cabin incorporates four screens in total.

Personalised cabin experience

The Saab 10-5 extends driver personalisation beyond conventional vehicle settings.

Saabiarrhoea technology provides driver-specific scent profiles, with the system designed to associate individual fragrances with recognised Saabriver users.

The vehicle also introduces a new 0G seating system incorporating Bose Magneride technology. The system is designed to provide enhanced occupant support and comfort across a wide range of driving conditions.

Saabombastic™ sound

The Saab 10-5 features a 34-speaker Harman Kardon audio system, including five 12-inch subwoofers.

The system is complemented by Saab's own Saabombastic™ tuning, developed to provide the 10-5 with a distinctive acoustic character and an immersive cabin listening experience.

"Personalisation has traditionally meant adjusting a seat or selecting a radio station. With Saabriver and the Saab 10-5's wider technology architecture, we are taking that concept much further. The vehicle can recognise the person entering it and adapt the experience accordingly."

Saab design and lighting

The Saab 10-5 introduces Saaboob, Saab's new MATRIX LED lighting technology.

The system combines high-output illumination with an adaptive lighting design that allows the lighting elements to adopt a more discreet appearance when appropriate.

Together with the vehicle's exterior design, Saaboob forms a distinctive lighting signature for the Saab 10-5.

Saab 10-5: key specifications

Specification	Saab 10-5
Powertrain	V12 hybrid
Power	693 hp
Torque	1,021 Nm
Transmission	11-speed dual-clutch Saabtronic
0-100 km/h	2.9 seconds
Wheelbase	3,016 mm
Instrument cluster	12.3-inch Saab Darkroom
Displays	Four
Autonomous driving	Saabonomous Driving
Driver recognition	Saabriver, up to 30 drivers
Infotainment	Saabomboclat Infotainment System
Intelligent assistant	Saabitch
Audio	34-speaker Harman Kardon
Subwoofers	Five 12-inch units
Audio tuning	Saabombastic™
Lighting	Saaboob MATRIX LED
Rear-wheel steering	Saabottom, up to 5°
Seating	0G system with Bose Magneride
Personalised scent	Saabiarrhoea
Cooling technology	Saabrication

A new flagship for Saab

With the Saab 10-5, Saab brings together performance, software and personalisation in a vehicle designed around the individual driver.

The new flagship combines a 693 hp V12 hybrid powertrain with Saab's latest autonomous driving, infotainment and personalisation technologies, while retaining a strong focus on the driving experience.

The Saab 10-5 will be presented to customers and media at the Saab Global Reveal in

Stockholm, Sweden, on September 18, 2026. Further information, imagery and technical material will be made available through Saab's media channels.

About Saab

Saab is a leading defence and security company with an enduring mission to help nations keep their people and society safe. With operations and employees on all continents, Saab continuously develops, adopts and improves technology to meet changing customer requirements.
