

**FOR IMMEDIATE RELEASE**

## **Saab unveils the new Saab 10-5**

Trollhättan, Sweden, 11 September 2026 — Saab has today unveiled the Saab 10-5, a new flagship passenger car developed at the company's Product Development Centre in Trollhättan.

The Saab 10-5 is equipped with a V12 hybrid powertrain rated at 693 hp and 1,021 Nm of torque. Power is transferred through an 11-speed dual-clutch transmission, designated Saabtronic. Acceleration from 0 to 100 km/h is stated at 2.9 seconds.

The car also introduces several new Saab systems for assisted driving, driver recognition, infotainment, lighting, seating, audio and cabin environment control.

"The Saab 10-5 marks a new step for Saab in passenger vehicles. We have applied the same discipline to engineering and system integration that we use across our other business areas, with greater emphasis on how the vehicle adapts to the driver" says Erik Lindqvist, President and CEO of Saab Automobile.

### **Performance and powertrain**

The hybrid system combines a 6.0-litre twin-turbocharged V12 with a 38 kWh battery mounted in the floor. Saab quotes an electric range of up to 78 km under WLTP and combined CO<sub>2</sub> emissions of 42 g/km. These figures remain provisional pending final homologation.

Saabtronic was developed for the 10-5 programme. The transmission and its thermal management system use Saab's Saabtronic cooling technology.

Saabottom rear-wheel steering allows up to five degrees of rear axle movement. The system is intended to reduce low-speed turning radius and support stability at higher road speeds. The wheelbase measures 3,016 mm.

### **Saabonomous Driving**

The Saab 10-5 is the first Saab car to be offered with Saabonomous Driving. The system uses lidar, cameras and map data as part of the vehicle's electronic architecture.

Where permitted by local regulation and within defined operating conditions, the driver may hand over control to the system. Saab will release Saabonomous functionality in Sweden, Germany, Norway and the Netherlands from launch, with further markets to follow.

### **Saabriver**

Saabriver is Saab's driver recognition and personalisation system. It can store profiles for up to 30 drivers and apply settings for seating, climate, audio, navigation, lighting and related functions when a registered user enters the vehicle.

"With Saabriver, the vehicle identifies who is driving and applies the correct settings automatically. That is a practical extension of the work we are doing elsewhere in

human-machine interaction" says Sofia Ekström, Head of User Experience and Digital Systems at Saab Automobile.

### **Saabomboclat Infotainment System**

Infotainment functions are handled by the Saabomboclat system, running Saab OS 10. The driver uses a 12.3-inch Saab Darkroom display. Three additional screens are fitted in the cabin.

Voice control is provided through Saabitch, Saab's in-car assistant. Saabitch Pro is included on Premium Plus specification.

### **Cabin and audio**

Saabiarrhoea provides driver-specific scent settings linked to Saabriver profiles. Front seats use the OG system with Bose Magniride. A 34-speaker Harman Kardon installation is available, including Saabombastic audio tuning.

### **Exterior and lighting**

Saaboob MATRIX LED headlamps are fitted as standard. The exterior length is 5,218 mm. Twelve paint finishes are offered at launch, including Aero Blue and Trollhättan Copper on Launch Edition cars.

### **Market introduction**

The Saab 10-5 will be shown to media and customers in Stockholm on 18 September 2026. Orders open in Sweden, Norway, Germany, the United Kingdom and the Netherlands. Deliveries are planned to begin in the second quarter of 2027.

List prices start at EUR 189,000 for Core specification, EUR 224,000 for Premium Plus and EUR 268,000 for Launch Edition. Production will take place in Trollhättan.

### **Safety and sustainability**

The Saab 10-5 is being developed to meet current Euro NCAP requirements. Battery cells for the hybrid system are supplied by Northvolt. The Trollhättan plant is certified to ISO 14001.

### **Technical data**

| Specification           | Saab 10-5                |
|-------------------------|--------------------------|
| Body style              | Four-door sedan          |
| Length / width / height | 5,218 / 1,998 / 1,445 mm |
| Wheelbase               | 3,016 mm                 |
| Kerb weight (DIN)       | 2,285 kg                 |
| Drag coefficient (Cd)   | 0.24                     |
| Powertrain              | 6.0-litre V12 hybrid     |
| System output           | 693 hp (515 kW)          |
| Torque                  | 1,021 Nm                 |
| Battery                 | 38 kWh                   |

|                                  |                            |
|----------------------------------|----------------------------|
| Electric range (WLTP)            | Up to 78 km                |
| Transmission                     | 11-speed Saabtronic        |
| 0-100 km/h                       | 2.9 s                      |
| Top speed                        | 312 km/h                   |
| Fuel consumption (WLTP)          | 2.1 l/100 km (provisional) |
| CO <sub>2</sub> emissions (WLTP) | 42 g/km (provisional)      |
| Drive                            | All-wheel drive            |
| Rear-wheel steering              | Saabottom, up to 5°        |
| Turning circle                   | 11.2 m                     |
| Boot volume                      | 412 l                      |
| Fuel tank                        | 68 l                       |
| Assisted driving                 | Saabonomous Driving        |
| Driver recognition               | Saabriver (30 profiles)    |
| Displays                         | Four                       |
| Infotainment                     | Saabomboclat / Saab OS 10  |
| Voice assistant                  | Saabitch                   |
| Audio                            | Harman Kardon, 34 speakers |
| Lighting                         | Saabooob MATRIX LED        |
| Seating                          | 0G / Bose Magneride        |
| Scent system                     | Saabiarrhoea               |
| Production                       | Trollhättan, Sweden        |

## About Saab

Saab is a leading defence and security company with an enduring purpose, to help nations keep their people and society safe. Empowered by its 29,000 talented people, Saab constantly pushes the boundaries of technology to create a safer and more sustainable world. Saab designs, manufactures and maintains advanced systems in aeronautics, weapons, command and control, sensors and underwater systems. Saab is headquartered in Sweden. It has major operations all over the world and is part of the domestic defence capability of several nations.
