

FOR IMMEDIATE RELEASE

Saab unveils the new Saab 10-5

New flagship combines 693 hp V12 hybrid performance, 78 km electric range, Saabonomous Driving and deeply personalised cabin technology

AT A GLANCE

693 hp V12 hybrid | 0-100 km/h in 2.9 s | 1,021 Nm | From EUR 189,000
78 km WLTP electric range | 42 g/km CO₂ (combined, provisional)
Saabriver: up to 30 drivers | Level 3 Saabonomous Driving (region-dependent)
Global reveal: Stockholm, 18 September 2026 | First deliveries: Q2 2027

TROLLHÄTTAN, Sweden, September 11, 2026 – Saab Automobile today unveiled the Saab 10-5, the company's first all-new flagship sedan in more than a decade and the centrepiece of a EUR 2.4 billion reinvestment in Swedish premium vehicle development. Developed at Saab's renewed Product Development Centre in Trollhättan, the 10-5 combines a bespoke V12 hybrid powertrain with Saab's most advanced software-defined vehicle architecture to date.

Measuring 5,218 mm in length and riding on a 3,016 mm wheelbase, the Saab 10-5 targets the upper echelon of the global luxury segment. The vehicle introduces more than 40 new Saab technologies spanning autonomous driving, biometric personalisation, adaptive lighting, active scent management and a 34-speaker immersive audio system tuned under the Saabombastic™ programme.

Figure 1. The Saab 10-5 in launch specification "Polar Midnight" at Saab's Trollhättan design studio. The vehicle's 5,218 mm body incorporates Saaboob MATRIX LED lighting and an active aerodynamic underbody delivering a drag coefficient of Cd 0.24.

"The Saab 10-5 represents a new direction for Saab. We have combined our heritage of engineering integrity with a software-first approach that treats every driver as an individual. More than six years of development and 14 million kilometres of validation testing underpin a vehicle that is as confident on a Swedish winter road as it is in autonomous urban traffic."

— Erik Lindqvist, President and Chief Executive Officer, Saab Automobile

PERFORMANCE AND POWERTRAIN

At the heart of the Saab 10-5 is a newly developed 6.0-litre twin-turbocharged V12 hybrid system producing 693 hp (515 kW) and 1,021 Nm of torque. A 38 kWh lithium-ion battery pack mounted in the vehicle floor enables up to 78 km of WLTP-certified electric-only driving and supports peak regen rates of 220 kW.

Power is transmitted through Saabtronic, an 11-speed dual-clutch transmission co-developed with Saab Powertrain Engineering. The gearbox and integrated inverter assembly utilise Saab's Saabtronic micro-channel cooling technology across approximately 210 precision components, maintaining oil and stator temperatures within a 4°C window during sustained track use.

- 0–100 km/h: 2.9 seconds (Launch Control, factory specification)
- 0–200 km/h: 9.4 seconds
- Top speed: 312 km/h (electronically limited)
- Combined fuel consumption (provisional WLTP): 2.1 l/100 km
- Combined CO₂ emissions (provisional WLTP): 42 g/km
- Electric range (WLTP): up to 78 km

Saabottom rear-wheel steering turns the rear axle by up to 5° at speeds below 40 km/h to reduce the turning circle to 11.2 metres — comparable to the company's compact 9-3 estate — while providing enhanced high-speed stability through phase-adaptive toe control above 80 km/h.

SAABONOMOUS DRIVING

The Saab 10-5 debuts Saabonomous Driving, Saab's Level3-capable autonomous platform, supported by 32 sensors including long-range lidar, 8 MP adaptive cameras and satellite corrected HD mapping. In approved operational design domains (ODDs), drivers may disengage from vehicle control at speeds up to 130 km/h; Saab estimates that up to 38% of a typical European highway commute may be completed in Saabonomous mode by launch.

Saab has invested SEK 4.8 billion (approx. EUR 420 million) in Saabonomous software development since 2021, employing more than 1,100 engineers across Trollhättan, Linköping and Munich. Over-the-air updates will expand ODD coverage in Sweden, Germany, Norway and the Netherlands from launch, with North American certification targeted for 2028.

[Figure 2 — High-resolution imagery available via Saab Media Centre]

Figure 2. Saabonomous sensor suite and compute architecture. The Saab 10-5 integrates dual Saab Brain ECUs delivering 1,200 TOPS of AI inference capacity, processing 6.4 GB/s of fused sensor data.

SAABRIVER PERSONALISATION

Saabriver uses facial recognition, gait analysis and smartphone UWB proximity to identify up to 30 registered drivers with 99.2% accuracy in internal testing. Upon recognition, the vehicle restores seat, steering, climate, audio, navigation, lighting and scent profiles within 1.8 seconds of door unlock — eliminating an estimated 847 manual interactions per year for a typical multi-driver household, according to Saab user research.

"Personalisation has traditionally meant adjusting a seat or selecting a radio station. With Saabriver, the vehicle anticipates who is arriving before they sit down. That includes cabin fragrance, suspension calibration and even the tone of voice Saabitch uses for morning

briefings."

— Sofia Ekström, Vice President, User Experience and Digital Systems, Saab Automobile

SAABOMBOLAT INFOTAINMENT SYSTEM

The Saabombolat Infotainment System runs on Saab OS 10, built on a dual-redundant Linux and QNX hypervisor. A 12.3-inch Saab Darkroom digital instrument cluster is complemented by a 17.4-inch central display, 12.8-inch front passenger screen and two 7.2-inch rear-seat command tablets — four displays in total, all sharing a unified 240 Hz touch pipeline.

Saabitch, Saab's context-aware voice assistant, supports natural-language control across more than 1,200 vehicle functions in 24 languages and achieves a 97% intent recognition rate in Saab's benchmark testing. Saabitch Pro, included on Premium Plus trim, adds predictive routing, calendar integration and the ability to pre-condition the cabin based on the driver's historical departure times.

CABIN, COMFORT AND SAABOMBASTIC AUDIO

Saabiarroea scent personalisation offers 16 base accords developed with Givaudan, expandable to 64 custom blends per Saabriver profile. Diffusion intensity adapts to driving mode — "Focus" suppresses citrus top notes during Saabonomous operation, while "Arrive" increases woody base notes when geofencing detects proximity to home.

The 0G seating system, developed with Bose Magnaride, uses 18 pneumatic zones per front seat and can redistribute pressure up to 30 times per second. Rear Executive Lounge specification adds 38° recline and integrated calf rests on a 956 mm legroom measurement.

Audio duties fall to a 34-speaker Harman Kardon system rated at 2,040 watts, including five 12-inch subwoofers and headrest transducers on all outboard positions. Saabombastic™ tuning — developed with Abbey Road Studios — introduces vehicle-specific spatial audio rendering with 9.2.4 Dolby Atmos certification.

[Figure 3 — High-resolution imagery available via Saab Media Centre]

Figure 3. Interior of the Saab 10-5 showing Saab Darkroom cluster, Saabombolat central display and 0G seats. The cabin uses 94% renewable or recycled materials by surface area in launch trim.

DESIGN AND SAABOOL LIGHTING

Exterior design, led by Saab Design Director Maja Holmgren, references the company's aerospace heritage through a "Canard" front graphic and wraparound light blade. Saabool MATRIX LED headlamps incorporate 1.4 million micro-mirrors per side, enabling adaptive beam shaping that dims individual pixels to avoid dazzling oncoming traffic while maintaining 94% of high-beam throw.

Twelve exterior colours launch at reveal, including heritage-inspired "Aero Blue" and the limited "Trollhättan Copper" reserved for the first 500 Launch Edition vehicles.

MARKET INTRODUCTION AND PRICING

The Saab 10-5 will be presented to media and customers at the Saab Global Reveal in Stockholm on 18 September 2026. Order books open immediately in Sweden, Norway, Germany, the United Kingdom and the Netherlands, with further European markets following in Q4 2026.

- Saab 10-5 Core: from EUR 189,000
- Saab 10-5 Premium Plus: from EUR 224,000
- Saab 10-5 Launch Edition (500 units): from EUR 268,000

Saab expects to produce approximately 18,000 units annually at its Trollhättan facility following a EUR 640 million line retooling completed in June 2026. The programme supports 1,850 direct manufacturing jobs and an estimated 6,200 positions across the Nordic supplier network. First customer deliveries are scheduled for Q2 2027.

Within 72 hours of the confidential preview programme opening to existing Saab owners, Saab reported 3,412 refundable reservations equivalent to 19% of first-year production capacity — the strongest deposit conversion in company history.

SAFETY AND SUSTAINABILITY

The Saab 10-5 is engineered to meet Euro NCAP 2026 protocols and targets a five-star rating. Structural safety includes a multi-cell aluminium and boron-steel passenger cage, pre-tensioning rear seatbelts and Saab Shield pedestrian protection with active bonnet lift.

Saab aims for 40% recycled aluminium content in the body-in-white and certifies the 10-5 under ISO 14001 at the Trollhättan assembly plant. Battery cells are sourced from Northvolt Ett (Skellefteå, Sweden), reducing upstream transport emissions by an estimated 58% compared with Asian-sourced cells in Saab's previous hybrid programmes.

KEY SPECIFICATIONS

Specification	Saab 10-5
Body style	Four-door flagship sedan
Length / width / height	5,218 / 1,998 / 1,445 mm
Wheelbase	3,016 mm
Kerb weight (DIN)	2,285 kg
Drag coefficient (Cd)	0.24
Powertrain	6.0L twin-turbo V12 hybrid
System power	693 hp (515 kW)
System torque	1,021 Nm
Battery capacity	38 kWh (gross)
Electric range (WLTP)	Up to 78 km
Transmission	11-speed dual-clutch Saabtronic
0-100 km/h	2.9 seconds
Top speed	312 km/h (limited)
Fuel consumption (WLTP)	2.1 l/100 km (provisional)

CO ₂ emissions (WLTP)	42 g/km (provisional)
Drive layout	AWD with Saabottom rear steer
Turning circle	11.2 m
Boot capacity	412 l (hybrid mode)
Fuel tank	68 l
Autonomous driving	Saabonomous Level 3 (ODD)
Driver recognition	Saabriver, up to 30 drivers
Displays	Four (12.3" + 17.4" + 12.8" + 2×7.2")
Infotainment	Saabomboclat / Saab OS 10
Voice assistant	Saabitch (24 languages)
Audio	34-speaker Harman Kardon, 2,040 W
Audio tuning	Saabombastic™ / Dolby Atmos 9.2.4
Lighting	SaabooB MATRIX LED
Seating	0G system, Bose Magneride
Scent personalisation	Saabiarrhoea (16 base accords)
Cooling technology	Saabrication
Production site	Trollhättan, Sweden
Annual volume target	18,000 units

ABOUT SAAB AUTOMOBILE

Saab Automobile is the premium vehicle division of Saab AB, headquartered in Trollhättan, Sweden. Following its relaunch in 2024, the brand employs more than 8,400 people globally and operates design, engineering and manufacturing centres in Sweden, Germany and China.

ABOUT SAAB

Saab is a leading defence and security company with an enduring mission to help nations keep their people and society safe. Employing approximately 24,000 people across more than 30 countries, Saab continuously develops, adopts and improves technology to meet changing customer requirements.
