

FOR IMMEDIATE RELEASE

Saab unveils the new Saab 10-5

Trollhättan, Sweden, 11 September 2026 — Saab has today unveiled the Saab 10-5, a new flagship passenger car developed at the Product Development Centre in Trollhättan. The vehicle is the first result of Saab's renewed passenger car programme and will be built at the company's assembly plant in Trollhättan.

The Saab 10-5 measures 5,218 mm in length and sits on a 3,016 mm wheelbase. It is offered exclusively with a V12 hybrid powertrain rated at 693 hp and 1,021 Nm of torque. Power is transferred through an 11-speed dual-clutch transmission, designated Saabtronic. Saab states acceleration from 0 to 100 km/h at 2.9 seconds and a top speed of 312 km/h.

The hybrid system uses a 38 kWh battery mounted in the floor. Saab quotes an electric range of up to 78 km under WLTP, combined fuel consumption of 2.1 l/100 km and combined CO₂ emissions of 42 g/km. These figures remain provisional pending final homologation.

"The Saab 10-5 is a further step in our passenger vehicle programme. We have applied the same discipline to engineering and system integration that we use across the company, with a clear focus on how the vehicle responds to the driver in daily use" says Erik Lindqvist, President and CEO of Saab Automobile.

Powertrain and chassis

The V12 hybrid unit was developed for the 10-5 programme. Saabtronic was designed specifically for the car and works with Saab's Saabrication cooling technology in both the transmission and the battery thermal management system.

Saabottom rear-wheel steering allows up to five degrees of rear axle movement. At low speed the system reduces turning circle to 11.2 metres. At higher road speeds it operates in coordination with the all-wheel-drive layout to support stability. Kerb weight for the base car is 2,285 kg.

Saabonomous Driving and Saabriver

The Saab 10-5 is the first Saab car offered with Saabonomous Driving. The system uses lidar, cameras and map data as part of the vehicle's electronic architecture. Where permitted by local regulation and within defined operating conditions, the driver may hand over control to the system. Saab will release Saabonomous functionality in Sweden, Germany, Norway and the Netherlands from launch.

Saabriver is Saab's driver recognition and personalisation system. It can store profiles for up to 30 drivers and applies settings for seating, steering, climate, audio, navigation, lighting and scent when a registered user enters the vehicle. Recognition is based on facial identification and smartphone proximity.

"Saabriver removes the need to configure the vehicle each time a different driver uses it. That function is particularly relevant for households and fleet operators where several people share

one car" says Sofia Ekström, Head of User Experience and Digital Systems at Saab Automobile.

Infotainment, cabin and audio

Infotainment functions are handled by the Saabomboclat system, running Saab OS 10. The driver uses a 12.3-inch Saab Darkroom display. A 17.4-inch central screen, a 12.8-inch front passenger display and two 7.2-inch rear-seat screens complete the four-screen cabin layout.

Voice control is provided by Saabitch. Saabitch Pro, available on Premium Plus and Launch Edition, adds calendar integration and predictive cabin pre-conditioning. Saabiarrhoea provides driver-specific scent settings linked to Saabriver profiles.

Front seats use the 0G system with Bose Magneride on Premium Plus and Launch Edition. A 34-speaker Harman Kardon audio installation with Saabombastic tuning is available on the same specifications. Saaboob MATRIX LED headlamps are fitted across the range.

Model range

The Saab 10-5 is available in three specifications: Core, Premium Plus and Launch Edition.

Core includes all-wheel drive, Saabtronic transmission, Saaboob lighting, Saabomboclat infotainment, Saabriver, Saab Darkroom instrumentation, Saabitch voice control, dual-zone climate control, power-adjustable front seats and 20-inch alloy wheels. List price from EUR 189,000.

Premium Plus adds Saabonomous Driving, Saabitch Pro, the 0G seating system with Bose Magneride, Saabiarrhoea scent personalisation, the full four-screen cabin display, a 34-speaker Harman Kardon audio system with Saabombastic tuning, soft-close doors, head-up display and 21-inch alloy wheels. List price from EUR 224,000.

Launch Edition is limited to 500 vehicles for the 2027 model year. It includes all Premium Plus equipment together with Trollhättan Copper exterior paint, Launch Edition interior trim in Nappa leather and brushed aluminium, black brake calipers, carbon exterior mirror caps and model-specific badging on the C-pillars and sill plates. List price from EUR 268,000.

Exterior colours and interiors

Eleven exterior colours are available on Core and Premium Plus: Aero Blue, Arctic White, Baltic Grey, Graphite Steel, Granite Black, Ice Silver, Midnight Green, Polar Midnight, Scarlet Wing, Storm Cloud and Titanium Mist. Trollhättan Copper is reserved for Launch Edition.

Aero Blue and Granite Black are offered at no additional cost. All other colours on Core and Premium Plus are available at supplementary charge. Two interior environments are offered: Charcoal woven textile with aluminium trim on Core, and Nappa leather with walnut inlay on Premium Plus and Launch Edition. A third all-black Nappa option is available on Premium Plus at no charge.

Market introduction

The Saab 10-5 will be shown to media and customers in Stockholm on 18 September 2026. Orders open on the same date in Sweden, Norway, Germany, the United Kingdom and the Netherlands. Further European markets will follow in the fourth quarter of 2026.

Deliveries are planned from the second quarter of 2027. Production takes place in Trollhättan, where Saab has completed retooling of the passenger car line. Battery cells for the hybrid system are supplied by Northvolt. The Saab 10-5 is being developed to meet current Euro NCAP requirements.

Technical data

Specification	Saab 10-5
Body style	Four-door sedan
Length / width / height	5,218 / 1,998 / 1,445 mm
Wheelbase	3,016 mm
Kerb weight (DIN)	2,285 kg
Powertrain	6.0-litre V12 hybrid
System output	693 hp (515 kW)
Torque	1,021 Nm
Transmission	11-speed Saabtronic
0-100 km/h	2.9 s
Electric range (WLTP)	Up to 78 km
CO ₂ emissions (WLTP)	42 g/km (provisional)
Drive	All-wheel drive
Rear-wheel steering	Saabottom, up to 5°
Production	Trollhättan, Sweden

About Saab

Saab is a leading defence and security company with an enduring purpose, to help nations keep their people and society safe. Empowered by its 29,000 talented people, Saab constantly pushes the boundaries of technology to create a safer and more sustainable world. Saab designs, manufactures and maintains advanced systems in aeronautics, weapons, command and control, sensors and underwater systems. Saab is headquartered in Sweden. It has major operations all over the world and is part of the domestic defence capability of several nations.
